SUMMARY

Collaborative Computer Science student with experience building backend and full-stack web applications using Django, Express.js, and SQL databases. Strong foundation in writing reliable, testable code, debugging software issues, and working in Agile team environments. Seeking a Software Engineering Intern role focused on developing scalable, reliable, and mission-focused software systems while continuing to grow as an engineer.

SKILLS

Backend: Django, Express.js, RESTful APIs, SQL, SQLite, Firebase

Frontend: React, JavaScript, HTML, CSS

Programming Languages: Java, Python, C

Tools: Git, Docker, GitHub, Trello, WordPress

EDUCATION

University of Wisconsin-Milwaukee, Milwaukee, WI

GPA: 3.77

MS Computer Science

Expected Graduation: December 2027

BS Computer Science (Accelerated Master's Track)

Expected Graduation: May 2026

WORK EXPERIENCE

World Affairs Seminar: *Web Developer Intern*, Milwaukee, WI

January 2026 – Present

- Worked within an Agile Scrum team of 5 to design and implement website features, resolve integration issues, and deliver production-ready updates for a nonprofit serving 30,000+ students globally using WordPress.
- Contributed to implementation of website features and debugging production issues within an Agile sprint cycle.
- Authored technical documentation outlining website structure and maintenance workflows to support long-term ownership by the nonprofit's IT manager.

Testlio: *Software Tester*, Remote

July 2025 – Present

- Execute structured and exploratory test cases on production-level web applications to identify defects and validate fixes.
- Collaborate with engineers to reproduce defects, validate fixes, and support regression testing in rapid-release cycles.

PROJECT EXPERIENCE

Habit.lio: Capstone Project

January 2026 – May 2026

- Built a Chrome Extension habit tracking application using React and Firebase to manage user authentication, synchronize user data, and maintain reliable application state.
- Collaborated within an Agile Scrum team to design application features, troubleshoot functionality issues, and support iterative development of the extension.

Express Survey App: Personal Project

August 2025 – January 2026

- Designed and implemented a backend-driven web application that asks for responses regarding modern video games, using RESTful APIs and SQL-based data persistence with Express.js and SQLite.
- Designed relational database tables and wrote SQL queries to ensure accurate and efficient data handling.
- Implemented server-side validation and structured routing to ensure predictable request handling and data integrity.

Course Enrollment Manager: Intro to Software Engineering course

March 2025 – May 2025

- Led backend development of a role-based Django application that allows students, professors, and administrators to manage course enrollment and scheduling.
- Designed and executed unit tests to validate role-based workflows and prevent regression defects across user permissions.
- Participated in Agile Scrum workflow including sprint planning, story refinement, sprint reviews, and code reviews.

HONORS AND ACTIVITIES

- **Anu and Satya Nadella Scholarship Recipient:** Full-ride scholarship funded by Microsoft CEO.
- **HERA Data & AI Learning Badge:** Badge that I received following completion of MKE Tech Hub Coalition's FUSE AI bootcamp.
