SUMMARY

Computer Science graduate with experience developing, testing, and maintaining production web applications. Skilled in Java, TypeScript, JavaScript, Python, React, Django, REST APIs, SQL, Git, automated testing, CI/CD, and AI-assisted development. Experienced collaborating across Agile teams, investigating technical issues, producing technical documentation, and leading a database-backed software project.

SKILLS

Programming & Development: Java, TypeScript, JavaScript, Python, HTML/CSS, React, Next.js, Django, Node.js, Express.js, REST APIs, SQL, MySQL, SQLite, Drizzle ORM, Object-Oriented Programming

Testing & Reliability: Playwright, Cypress, Cucumber, Vitest, Django Test Framework, Unit Testing, Regression Testing, Debugging

Tools & Practices: Git, GitHub, GitLab CI/CD, GitHub Actions, Docker, Jira, Azure DevOps, Cloud Computing Fundamentals, Microsoft Azure Fundamentals, Agile/Scrum, SDLC, Technical Documentation

AI-Assisted Development & Generative AI: GitHub Copilot, ChatGPT, Claude, Gemini; Code Generation, Debugging, Testing, Documentation, Output Validation, Responsible AI Practices

EDUCATION

University of Wisconsin-Milwaukee

Bachelor of Science in Computer Science, Honors College

GPA: 3.77

Milwaukee, WI

Graduated: May 2026

EXPERIENCE

Quality Assurance Automation Testing Intern

June 2026 – August 2026

Library of Congress

Remote

- Refactored legacy Cypress test suites and developed Playwright automated tests in TypeScript for production legislative features on the Congressional Research Service's website, serving 10,000+ congressional staffers weekly.
- Developed and maintained Playwright, Cucumber, and Gherkin tests and supported automated execution through GitLab CI/CD, expanding test coverage by 50%.
- Documented and triaged 20+ defects in Jira and Azure DevOps, collaborating with developers to verify fixes.

Web Developer Intern

January 2026 – May 2026

World Affairs Seminar

Milwaukee, WI

- Collaborated within a five-person Agile Scrum team to design, develop, test, debug, and deploy features for a production WordPress website for a nonprofit serving more than 30,000 students globally.
- Resolved integration defects and authored technical documentation covering website structure, feature behavior, and maintenance workflows.

Software Tester

July 2025 – April 2026

Testlio

Remote

- Executed 100+ manual test cases for web and mobile applications, verifying user workflows, identifying defects, and documenting results for QA review.
- Conducted exploratory testing to identify usability issues, edge cases, and regression risks across 30+ application features.
- Wrote clear defect reports with reproduction steps, expected versus actual results, screenshots, and environment details to support developer troubleshooting.

PROJECTS

Course Enrollment Manager | *Django, Python, SQL, SQLite, HTML/CSS, Django Test Framework* March 2025 – May 2025

- Led a four-person team in translating requirements into a role-based Django application supporting course enrollment, scheduling, permissions, and database-backed workflows.
- Implemented backend business logic and data persistence using Django ORM and SQLite across student, professor, and administrator functionality.
- Developed Django unit and regression tests covering permissions, backend logic, application workflows, and edge cases.
